

## TAKE ADVANTAGE, GROW YOUR BOTTOM LINE!

For over 10 years our team has worked directly with *Eversource, National Grid, Unitil, PSNH, United Illuminating*, and many more leading utilities to bring energy efficiency to business owners.

Our projects carry significant incentives & benefits that create immediate impact to your bottom line. CES will turnkey your project so you can focus on what you do best – growing your business!

Utility programs can help fund your next project, allowing you to \*qualify for incentives up to 70% off with 0% financing, on bill repayment, rebates or point-of-sale rebates.

\* For Qualified Customers

## A HISTORY IN CONSERVATION.

With over 150 years of combined experience, our team is excited to help business owners achieve cost savings through energy efficiency. Our passion is driving the latest industry breakthroughs in electric, gas, water, and solar.

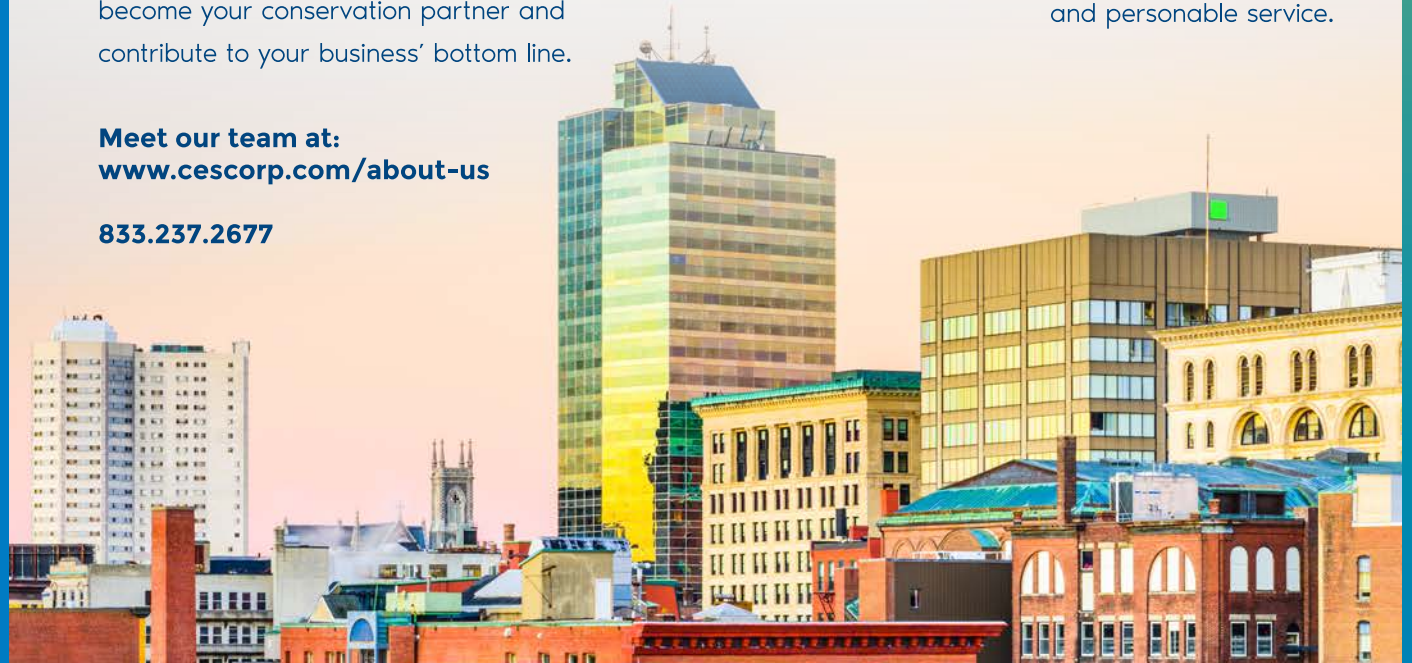

We have witnessed the positive impact created by accessing the utility incentives at your disposal. CES hopes to become your conservation partner and contribute to your business' bottom line.

833.237.2677

Proudly offering New England businesses leading products & technologies in combination with unmatched knowledge, creativity, and personable service.

Representing lifetimes of collective experience within the Energy Services industry

Lighting & Controls

Thermostats

Refrigeration

HVAC

Pipe & Duct Insulation

Water Conservation

Alternative Energy Sources

## LET'S WORK TOGETHER!

We're motivated to increase your energy savings while lowering operational and maintenance costs. The value we present in our conservation proposals is something we're proud to stand behind, and should you choose to move forward with us on your project, CES will expertly guide you each step of the way.

Collaboration between your business and CES will provide an abundance of energy savings opportunities. We will leverage our experience, knowledge and creativity to provide a cost-effective turnkey solution that will create an immediate impact to your bottom line.

## WHAT SHOULD YOU EXPECT?

Together we'll discuss how to leverage all available benefits to meet your business' energy conservation needs.

Addressing any concerns you raised in our initial meeting, we'll review all the savings opportunities throughout the site assessment. We will evaluate each room and space to ensure all factors of your energy usage are recorded including electricity, gas, and water.

Using the identified conditions and equipment in your facility, our design team will provide energy saving solutions as well as identify utility benefits and incentives. Our Energy Efficiency Specialist will review the solutions and allow you to make an informed decision to move forward with our proposal. All we need is your signature!

All energy conservation solutions will be ordered and our experienced and licensed installers will be mobilized. We will coordinate the installation with your schedule in mind to ensure a safe workplace, all while maintaining your productivity.

Once everything's installed and cleaned up including proper recycling of equipment, packaging, metal and trash, you are welcome to enjoy your energy savings!

## YOUR ENERGY ASSESSMENT

A detailed analysis of the unique characteristics in your space will help us highlight all possible improvement and their savings.

Our energy efficiency team will take an informed look as they accompany you on a walk-through of your location. Within two weeks we'll present our formal evaluation yielding the highest utility incentive and maximum savings to defray project costs.

For a closer look at how an energy assessment could save on utility costs, and to request yours today please visit [www.cescorp.com/energy-assessments](http://www.cescorp.com/energy-assessments)
