

Ecofin Documentary

If our oceans die, we die. Emotional and engaging, the Ecofin Documentary promotes the necessary act of preserving the quality of our oceans and beaches through the story of TheEcoFin. TheEcofin identifies beach debris as a potential resource to produce a sustainable, lightweight, high-performance surf fin. A game changer! Inspiring the viewer to preserve and enhance our world by getting out there to make an impact the TV/Cinema/Kickstarter Documentary "TheEcofin" is a symbol of change. At Flying Fox Films we are thrilled to become part of the movement.
