

Legacy is what drives us. Our stories are what we're made of, and derived from years experience. Memories are rich and unique, and often shape how we act in our daily lives and what we choose to leave behind for the next generation. Those artifacts of life are what I call beauty.

Searching to extend that richness of experience in our environment is only natural. My calling as an artist and craftsman is to provide conduits that contribute to your story and encourage appreciation for beauty that stands the test of time.

Furniture by nature is functional. Through design and integrity of vision, these mundane objects of utility can transcend that narrow vocation and truly become pieces of art that reflect your own story.

Master craftsmen breath soul into design. With truly unique and hand tooled furniture, your daily routine can be elevated into cherished ritual as you gain exquisite investments that last generations.

Discovering Beauty in Function is What Enriches Our Daily Lives.

Influenced by the archetypal nuances of both Japanese and American tradition, each of my pieces are always hand crafted to world class heirloom quality standards. One of a kind designs, limited runs, and the inclusion of rare materials enhance the 100% true hardwoods that are only sustainably sourced from North America.

Envisioned with Brazilian and Midcentury Modern aesthetics in mind, my integrity as a master craftsman redefines the union of fine art and luxury tier furniture. Impeccable joinery and construction yield visually stunning pieces that are always safe for the environment and your home.

Forever free from harmful chemicals, gasses, or materials from waste producing factories.
